

ProductionMEDICAL

MANUFACTURING YOUR SUCCESS

Cost-effective manufacturing of catheters and related medical devices in a certified ISO Class 7 clean room.

- clean room manufacturing
- ISO Class 7 certified facility
- high or low volume production environment
- lean manufacturing practices
- quality assurance
- medical device component forming

● Ongoing contract manufacturing

We'll manage your medical production volume – whether high or low – with quality and care in our ISO Class 7 certified clean room.

● Occasional small batch fulfillment

For occasional contract manufacturing needs – we can produce low volume or short duration runs of catheters or other medical devices.

● Prototype & engineering qualifications

Our clean room technicians can create prototypes of catheters or medical devices needed for qualification and validation studies.

Your success is important to us. Your project is managed by a team of quality-focused manufacturing specialists.

They ensure your products are manufactured on time and per your specifications, taking a proactive approach to design the highest-quality and most cost-effective processes.
